# ADJUSTABLE RATE MORTGAGE LOAN PROGRAM DISCLOSURE <br> FOR 15-20-30 YEAR LOANS <br> INTEREST LOCKED FOR 1, 2, 3, 5 OR 7 YEARS 

#### Abstract

This disclosure describes the features of the Adjustable Rate Mortgage (ARM) Program you are considering. Information on other ARM programs is available on request and you should ask for the current interest rate and margin. This loan does not include a demand feature. This loan program contains a variable rate feature which provides that the interest rate and payment can change. The interest rate is based on the value of an Index plus a margin, rounded to the nearest $.125 \%$. The Index is $\mathbf{1 2}$ month Moving Treasury Average (12-MTA). Information about the index is available weekly at https://www.bankrate.com/rates/interest-rates/1-year-mta/ , subject to the following conditions:

a. Any increase could result in an increase in the required monthly payment.
b. Your initial interest rate may be discounted and will not be based on the Index used to make later adjustments. Due to this, your interest rate may increase at the first adjustment, even if the Index remains the same or decreases. Ask us for the amount of the current interest rate discount.
c. You will be notified in writing at least two hundred and ten (210) days but not more than two hundered forty (240) days before the due date of the first payment at an adjusted level. This notice will contain information about your interest rate, payment amount and loan balance. You will be notified of any subsequent rate changes in writing at least sixty (60) days but not more than one hundred twenty (120) days in advance before the due date of a payment at an adjusted level.
d. You may pay this ARM loan in whole or part without penalty at any time. If you are paying more than your regularly scheduled payment, you must notify us as to how you want the funds applied.

## SEE HOW TO CALCULATE YOUR PAYMENT

To see what your monthly P\&I payment would have been during that period, divide your mortgage amount by $\$ 10,000$ then multiply the monthly payment by that amount. (For example, in $\mathbf{2 0 2 2}$ the monthly payment for a mortgage amount of $\$ 100,000$ would be $\$ 100,000$ divided by $\$ 10,000=10 ; 10 \times \mathbf{\$ 2 . 5 1}=\mathbf{\$ 2 5 . 0 7}$. This reflects the maximum interest rate of 7.875\% on a 30 year amortization loan, fixed for 1 year.)

An ARM is different from a fixed-rate mortgage loan. For a fixed-rate loan, the monthly payments of principal and interest do not change during the life of the loan. You should consider carefully which type of loan is best for you.

> You should carefully read this disclosure; the promissory note, deed of trust or mortgage; any riders; and all other documents that you will be asked to sign if you accept an ARM loan.
